Addendum 01

Dated: 08th January, 2018

This addendum-01 is issued with respect to RFP No: SARI/EI-2017-13 for "Formulation of Model set of electricity regulations for implementation of the SAARC Framework Agreement for Energy (Electricity) Cooperation (SFAEC) and for advancing electricity trade in the SAARC Countries to inform the following:

Sl. No	Reference	Clause details	PWC Query	IRADe Clarifications /Amendment
1.	Annexure I C.	The consultant is expected to review the study done by SARI/EI in 2014 and other studies and build upon it.	In addition to SARI/EI study in 2014 on laws/regulations etc., we understand that IRADe was preparing Model regulations for Trading Licensee and Open Access and harmonization of Grid Codes. The outputs of these studies would be shared with Consultant for this study. Please confirm	SARI/EI has carried out a study on Trading Licensee and Open Access but not the Model Set of Regulations on Open Access and Trading License. However, the findings of the study will be shared with successful bidder. Harmonization of Grid Codes study can be accessed from the SARI/EI link below https://sari-energy.org/wp-content/uploads/2017/08/Harmonisation-of-grid-codes-operating-procedures-and-standards-to-facilitatepromote-cross-border-electricity-trade-in-the-south-Asia-region-Framework-grid-code-guidelines-Rajiv-LR-1.pdf
2.	Multiple	Model set of electricity regulations Model set of SAARC Electricity Regulation	Please clarify whether single regulation or multiple regulations need to be developed as a part of this assignment?	Only one Model set of SAARC Electricity Regulation for Regional Power Trade need to be prepared in a comprehensive manner and can be divided into various sections focusing on various regulatory aspects to meet the objective of the study.

3.	Annexure I, C.5	Based on the above paras from ToR C (1) to C (4), develop a Model set of SAARC Electricity Regulation for Regional Power Trade (SERRPT) which harmonizes electricity regime for implementation of SFAEC and advancement of all forms of CBET in the SAARC Region.....	Please elaborate on what aspects of the SAARC Framework Agreement for Energy (Electricity) Cooperation (SFAEC) to be covered in Model set of SAARC Electricity Regulation for Regional Power Trade (SERRPT)?	All the Articles of SAARC Framework Agreement for Energy (Electricity) Cooperation (SFAEC) needs to be reviewed, analyzed for preparing model set of regulations..
4.	Annexure I, C.5along with a minimum set of regulatory changes required vis-a-vis it's provisions/sections in the prevailing electricity regulation of each SAARC members states	Please elaborate on the need for 'minimum set of regulatory changes required' when Model set of SERRPT is being developed.	"minimum set of regulatory changes required" means based on the review and analysis, consultant to suggest minimum set of regulatory changes required in various provisions/sections of the prevailing electricity regulation of each SAARC member state for implementation of Model set of SAARC Electricity Regulation for Regional Power Trade (SERRPT).
5.	Annexure I, C.6	To present the key findings C (5) to SAARC Council of Experts of Energy (Electricity) Regulators (CEERE) members for deliberation and to seek CEERE member's suggestion /inputs /observations.	Would this presentation be in India? If it is outside India, we assume IRADe would bear the travel, accommodation and other expenses of Consultants. Please confirm.	For domestic travel in India, consultant to bear expenses towards travel, accommodation. If it is organized, outside India, IRADe will bear associated travel & accommodation expenses of one/two member of Consultants as per the IRADe policy for participating in the meeting.

6.	Annexure I, D.4	Submission of Final report, after incorporating all the suggestion/observations of SAARC Council of Experts of Energy (Electricity) Regulators (CEEERE) members	Who all are members of SAARC Council of Experts of Energy (Electricity) Regulators (CEEERE)? We understand that IRADe would seek comments from CEEERE members and provide them to Consultant within two weeks from submission of Draft Report to adhere to timeline mentioned in the RFP.	Member of SAARC Council of Experts of Energy (Electricity) Regulators (CEEERE) are represented by SAARC member states. As per RFP, Consultant to submit final report within 60 days of submission of draft set of model set of regulations. IRADe shall try to facilitate with the SAARC Council to expedite the meeting of members within the time line of RFP. As per RFP, the consultant will be required to present key findings of the study to members of SAARC Council of Experts of Energy (Electricity) Regulators (CEEERE) and based on the comments of members, it is the responsibility of the consultant to submit final report. In case meeting does not happen, IRADe will collect comments from members and share the same with the successful bidder.
7.	Annexure II, 1.2, (c)	The methodology should address all three parts of the project viz. related to the running of the pilot market, market rules and design and capacity building (training) parts.	It seems this is not relevant for this RFP. Please clarify.	The text/para "The methodology should address all three parts of the project viz. related to the running of the pilot market, market rules and design and capacity building (training) parts " be deleted and replaced with "The methodology should address all the aspects of the study "
8.			The time for proposal submission is very short. We request to extend the submission date by one week to 19 th January 2018.	Proposal Submission date is extended till 23rd January, 2018.

All other terms and conditions of the RFP will remain same.
